

THE GRID

Launch Content Checklist.

Everything needed — page by page — to take the site live

Prepared for

The Grid Technologies (Pty) Ltd
Digital Out-of-Home Advertising

Prepared by

Date

3 July 2026

What we need to go live.

The mockup is approved and fully demonstrable — every gap below is currently filled with a tasteful placeholder or interim asset. This document lists, page by page, only what should be **swapped for final, verified content** before launch: copy to confirm, images, video and the few functional items.

Priority: ● Required to launch ● Strongly recommended ● Optional / phase 2

THE PHOTOGRAPHY RULE — APPLIES TO EVERY PHOTO

From your CI guide: each image must show **at least 2 of 3** — (1) the asset hero-positioned (billboard / screen / tray), (2) real in-situ context, (3) people in the shot. This is what makes the imagery feel unmistakably like The Grid.

Site-wide — appears on every page

These live in the header, footer and page metadata across all eight pages, so supplying them fixes the whole site at once.

Item	What's needed	Priority
Logo	Final brushed-aluminium "GT" mark — vector SVG + transparent PNG ≥512px. Confirm the interim mark now in place is the final version.	Required
Favicon	Icon set — 32×32, 180×180 (Apple touch), 512×512, .ico. An interim SVG favicon is in place.	Recommended
Social share image	1200×630 — logo + tagline on brand background, for WhatsApp / LinkedIn link previews.	Recommended
Contact details	Confirm phone +27 79 365 0188 & email sales@thegridtech.co.za.	Required
Social links	Confirm Facebook, LinkedIn & whether the Instagram handle is correct / exists.	Required
Licensed webfonts	Century Gothic + Avenir .woff2 + web-embedding licence — else we keep the free stand-ins.	Optional
Legal pages	POPIA + Privacy policy text; decide if footer links are needed at launch.	Recommended

Each page, what it needs.

The site is eight pages. For each, here is the copy to confirm, the images and video to supply, and any functional items.

COPY TO CONFIRM

- **Required** Hero stats: **16+ Screens Live · 500K+ Daily Impressions · 21M Airport Passengers/yr · 100% Black-Owned** — an older brief said "35+ screens"; confirm the correct figure.
- **Recommended** Approve the hero headline & sub-copy.

IMAGES & VIDEO

- **Required** **Hero background video** — currently an interim clip. Supply a branded 8–12s loop (screen/billboard in-situ with people), muted, MP4, ≤6MB, + poster still. *Or* approve a single strong hero photo instead.
- **Recommended** **Journey explainer video** — a real clip is wired in; confirm it's the final "Home → Airport → Mall → Home" edit (we'll compress it for speed).
- **Required** **Client logos** for the scrolling marquee (see Clients).

COPY TO CONFIRM

- **Required** The 5 formats are correct: **Digital Billboards (DOOH) · Airport Security Trays · Static Large-Format (10m×70m) · Mobile Billboards · Brand Activations**. Confirm "Mobile Billboards" is a live offering.

IMAGES

- **Recommended** **Format photos ×5** (one per card) — a real LED screen, airport tray, the 10m×70m static, a mobile billboard, a brand activation. Cards are icon-only today. *The airport-tray and static can already use your supplied photos.*

COPY TO CONFIRM

- **Required** **Inventory sign-off** per location: Dainfern Square (10 DOOH + 10m×70m static), Planet Fitness (5 screens), Witkoppen Rd, and airport trays at OR Tambo / King Shaka / Cape Town. Confirm counts and any new / removed sites.

IMAGES

- **Recommended** **Location photos ×6** (one per point of presence), landscape ~16:10, ≥1200px — upgrades the text-only cards. Dainfern already covered by your FNB billboard photo.

COPY TO CONFIRM

- **Required** The stats band claims **21M passengers measured/yr · 500K+ impressions tracked · 16+ screens monitored live · 100% campaigns with attribution**. Confirm these are truthful — this page's whole promise is "proof, not promises," so the numbers must be defensible.

DATA — FULL SCREEN INVENTORY

- **Required** **A complete list of every screen and its location** — for each screen: site name, area / suburb, address or GPS, format (DOOH / static / airport tray), screen size & resolution, and any per-site audience or footfall figures. This is the source data behind the Data page numbers, the Points-of-Presence map, and every inventory claim across the site.

IMAGES (OPTIONAL)

- **Optional** A real **dashboard / report screenshot** would make "we measure" tangible. Icon-driven today.

DATA — MOST IMPORTANT ITEM ON THIS PAGE

- **Required** The two case studies (Nando's footfall, FNB trend) use **illustrative sample data, not real figures**. Before launch either: (a) replace with verified campaign numbers, (b) keep but clearly label as illustrative, or (c) remove the charts. We recommend (a) if any real results exist.

CLIENT LOGOS — THE MARQUEE

- **Required** **Confirm the brand list + display rights** — 25 names currently shown as text (Nedbank, Coca-Cola, Vodacom, Nando's, FNB, Absa, DStv, Showmax, Telkom, eBucks, Planet Fitness...). Trim to brands you may show publicly.
- **Required** **Supply logo files** — SVG or transparent PNG, white / single-colour (they sit on a dark band).

COPY TO CONFIRM

- **Recommended** Approve the "Our Story" paragraph and the core positioning quote.

IMAGES — BIGGEST VISIBLE GAP ON THE SITE

- **Required** **Three journey-stage photos** — the Home, Airport and Mall panels are grey "Image placeholder" tiles:
 - **01 · Home** — a commuter / home-life shot with a Grid touchpoint
 - **02 · Airport** — airport tray in use (*your supplied tray photo works*)
 - **03 · Mall** — a mall screen in-situ with people

PHOTOS & COPY

- **Required** **Team headshots ×4** — square 1:1, ≥800px, consistent lighting. Currently coloured initials tiles.
- **Required** **Confirm names, roles & approve bios** (drafted by us): **Thando Mabuza** — Director · **Eddie Mabuza** — Business Development · **Zenele Biyela** — Data Analyst · **Natasha Dixon** — Account Manager.
- **Optional** **A real, attributed testimonial** (name / role / company) — one placeholder quote is in place, else we remove it.

FUNCTIONAL — NEEDED FOR A WORKING PAGE

- **Required** **Form destination** — the "Start a Campaign Brief" form validates but doesn't send yet. Supply a Formspreet endpoint (free, no backend), the email to receive briefs, or approval for a mailto link.
- **Required** **Exact address to pin** — the map shows generic Johannesburg. Give the office address, or confirm you want it city-level.
- **Recommended** Confirm the WhatsApp line (wa.me/27793650188).

02 — SEO & DISCOVERABILITY

Found on Google.

The technical SEO foundations are already built into every page. A handful of items still need your input — mostly Google account access — to switch discoverability fully on at launch.

Already in place — built & ready

Item	What's done
Unique page titles & meta descriptions	Every one of the 8 pages has its own hand-written title and description (see table below to approve wording).
Canonical URLs	Each page declares its canonical address to prevent duplicate-content penalties.
XML sitemap & robots.txt	Complete sitemap of all pages + robots file, both pointing to the final domain — ready to submit to Google.
Social share (Open Graph) tags	Title, description & image tags on every page for rich WhatsApp / LinkedIn / X link previews (final share image still to supply — item 3).
Semantic, accessible markup	Proper heading hierarchy, image alt text, and ARIA labels — Google reads structure, screen-readers read content.
Fast, mobile-first build	Hand-coded, dependency-free, fully responsive — page speed and mobile-friendliness are direct ranking factors.

SEO titles & headlines — approve the wording

These are the titles and descriptions that appear as your **Google search result** and social previews. Drafted by us — please confirm or tweak.

Page	Search title	Meta description
Home	The Grid Technologies — Digital Out-of-Home Advertising	100% Black-owned digital Out-of-Home advertising. Strategic, data-driven brand journeys across premium points of presence in South Africa.
Services	Services — The Grid Technologies	Digital billboards (DOOH), airport security trays, static large-format, brand activations, data & analytics and closed-loop journey strategy.
Points of Presence	Points of Presence — The Grid Technologies	Premium digital and static OOH locations across Johannesburg and South Africa's three busiest international airports.
Data & Analytics	Data & Analytics — The Grid Technologies	Location and demographic data, footfall measurement, dwell time and attribution modelling. Real-world proof of out-of-home performance.
Clients	Clients — The Grid Technologies	Brands that move with The Grid — South Africa's leading brands trust our premium digital Out-of-Home network.
Way of Work	Way of Work — The Grid Technologies	A closed-loop, end-to-end, strategically aligned approach to digital Out-of-Home advertising in South Africa.
Team	Team — The Grid Technologies	Meet the strategists, data analysts and account managers behind every closed-loop OOH campaign.
Contact	Contact — The Grid Technologies	+27 79 365 0188 · sales@thegridtech.co.za. Book a campaign or start a brief; we respond within 24 hours.

Needed from you to complete SEO

Item	What we need	Priority
Google account access	A Google account (or delegated access) to set up Analytics 4 and Search Console in The Grid's name. Analytics is not yet live — we add the tracking tag at launch.	Required
Social share image	1200×630 branded image for link previews (currently falls back to a video still). Same as site-wide item 3.	Recommended
Google Business Profile	Confirm / grant access to the Google Business (Maps) listing so local searches for "OOH advertising Johannesburg" surface The Grid.	Recommended
Confirm final domain form	Confirm the site should live at www.thegridtech.co.za (the whole site is already wired to this address) and that non-www should redirect to it.	Required

Target keywords (optional)

Any specific search terms you want to rank for, so we can tune copy and headings.

Optional

03 — HOSTING, DOMAIN & GO-LIVE

Getting it online.

The site will be deployed to **The Grid's own company hosting**. To publish it, we need access to that hosting and to the domain's DNS. It's a static, dependency-free site, so it runs on any standard web host — no special server software required.

Area	What it covers & what we need from you	Owner
Web hosting access	The site deploys to your existing company hosting. We need control-panel access (cPanel or equivalent) plus FTP / SFTP credentials and confirmation of the correct web root (public folder) for the domain.	The Grid supplies
Domain & DNS	Confirm The Grid owns thegridtech.co.za and provide access to the domain registrar / DNS (or add us as a technical contact) so we can point it at the site.	The Grid supplies
SSL certificate (HTTPS)	The padlock / https:// address that browsers and Google require. Most hosting panels include free auto-renewing SSL (Let's Encrypt) — we enable it, or confirm an existing certificate on your host.	The Grid host · Lubelo sets up
Email — do not disrupt	Your existing @thegridtech.co.za email must keep working. During the DNS cutover we change only the website records and leave your mail (MX) records untouched . Confirm your email provider so we protect it.	The Grid confirms
Backups & monitoring	Automated backups, restore cover and uptime monitoring on your hosting — kept current under the monthly management plan. Confirm whether your host also runs its own backups.	Lubelo (monthly)

Go-live sequence

Once Wave 1 content is in and the site is signed off at MVP, launch is a short, controlled cutover:

#	Step
1	Final content, images & integrations loaded; full QA and cross-device / cross-browser test pass.
2	Contact form, Analytics tag and WhatsApp button wired and tested end-to-end.
3	Deploy to The Grid's company hosting (via cPanel / FTP); enable & verify SSL.
4	Point thegridtech.co.za DNS at the live site (website records only — email untouched).
5	Switch the site from "hidden" to publicly indexable (the mockup is deliberately hidden from Google today).
6	Submit the sitemap to Google Search Console; confirm Analytics is receiving data.
7	Final live smoke-test on desktop & mobile — go-live confirmed.

NOTE ON THE CURRENT PREVIEW

The mockup you're reviewing is intentionally set to **"no-index"** so search engines don't list it before launch. Flipping it to public is a one-line change we make as the final go-live step (step 5 above).

04 — MASTER CHECKLIST

The tick-list.

A single view of every item. Tick each off as it's supplied.

#	Item	Page(s)	Priority	Done
1	Final logo (SVG + PNG)	All	Required	☐
2	Favicon set	All	Recommended	☐
3	Social share (OG) image	All	Recommended	☐
4	Confirm contact details	All	Required	☐
5	Confirm social links (esp. Instagram)	All	Required	☐
6	Confirm hero stats (screen count)	Home / Data	Required	☐
7	Branded hero video or hero photo	Home	Required	☐
8	Final journey explainer video	Home	Recommended	☐
9	Client logo files + confirmed list & rights	Home / Clients	Required	☐
10	Real case-study data (or relabel / remove)	Clients	Required	☐
11	3 journey-stage photos (Home / Airport / Mall)	Way of Work	Required	☐
12	Team headshots ×4	Team	Required	☐
13	Confirm team names / roles / bios	Team	Required	☐
14	Full screen-location schedule — every screen, site, format & specs	Data / POPs	Required	☐
15	Contact form endpoint (Formspree)	Contact	Required	☐
16	Exact map address	Contact	Required	☐
17	Hosting access (cPanel / FTP) + domain / DNS access	Hosting	Required	☐
18	Confirm final domain (www.thegridtech.co.za)	Hosting / SEO	Required	☐
19	Confirm email provider (protect MX during cutover)	Hosting	Required	☐

20	Google account (Analytics 4 + Search Console)	SEO	Required	☐
21	Approve SEO titles & meta descriptions	All	Recommended	☐
22	Google Business Profile access	SEO / Local	Recommended	☐
23	Format photos ×5	Services	Recommended	☐
24	Location photos ×6	POPs	Recommended	☐
25	Real testimonial(s)	Team / Clients	Optional	☐
26	Legal pages (POPIA / Privacy)	Footer	Recommended	☐
27	Licensed fonts (Century Gothic / Avenir)	All	Optional	☐

Suggested order of delivery

Wave	What to supply
Wave 1 <i>Unblocks launch</i>	Final logo · confirm all stats, inventory, contact & social details · team headshots + approved bios · client logos + confirmed list · real case-study data (or relabel) · 3 journey-stage photos · contact form endpoint · exact map address · domain / DNS access · confirm final domain & email provider · Google account for Analytics + Search Console.
Wave 2 <i>Polish</i>	Branded hero + final journey video · format & location photos · OG image · favicon set · legal pages · approve SEO titles/meta · Google Business Profile.
Phase 2 <i>Nice-to-have</i>	Licensed fonts · real testimonials · data dashboard screenshot · media kit.

IF ONLY A FEW THINGS CAN COME FIRST

The **hero visual**, **team headshots + bios**, **client logos**, and the **contact form endpoint** remove the most obvious "unfinished" signals and make the site launch-ready. Your two supplied photos (airport tray + FNB Dainfern billboard) are already wired into the Way of Work and Clients pages.
